API Authorization Settings

Default Audience

API Audience to use by default for [API Authorization flows](#).

Note: This setting is equivalent to appending the audience to every authorization request made to the tenant for every application. This will cause new behavior that might result in breaking changes for some of your applications. [Please contact support if you require assistance.](#)

Default Directory

Name of the connection to be use for Password Grant exchanges. The `default_directory` value should be the exact name of an existing connections of one of the following strategies: `auth0-adldap`, `ad`, `auth0`, `email`, `sms`, `waad`, `adfs`
